

VOTERS AGAINST BILLIONS TO ISRAEL

Last year Congress, under pressure from a powerful special interest lobby on behalf of a foreign country, sent Israel \$63 million per day of our tax money.

- This despite the fact that for years Americans have said we give Israel too much money.
- This at a time when many American families, municipalities, military veterans, and seniors are struggling to make ends meet.
- More of our tax dollars have been sent to Israel, a very small and affluent nation, than to any other country on Earth.
- Israel provides universal health coverage and heavily subsidized college tuition for its citizens, including free tuition to new citizens.
- Israel's national debt and unemployment rate are lower than our own. Internationally, its balance of payments is superior to ours.
- Israel has spied on the U.S and stolen our technology, tried to sink a U.S. Navy ship, works to push us into disastrous wars, and used our money in ways that violate international law, causing tragedy abroad, and hostility and damage to our country.
- It's time to stop allowing a special interest group and campaign donors on behalf of a foreign country to dominate U.S. policies.

It is long past time to stop sending Israel our money and our weapons!
